

## **Fisseha Berhane**

Ph.D. Candidate, Johns Hopkins University

325 Olin Hall 3400 N. Charles Street, Baltimore, MD 21218

Phone: 443-970-2353      Website: <http://datascience-enthusiast.com/>

Email: [fisseha@jhu.edu](mailto:fisseha@jhu.edu)

### **Education**

<i>Johns Hopkins University</i> , Baltimore, MD ---	Ph.D. in Atmospheric Physics	Sep. 2015
<i>Johns Hopkins University</i> , Baltimore, MD ----	M.A. in Atmospheric Physics	May 2013
<i>University of Connecticut</i> , Storrs, CT -----	M.S. in Hydro-climatology	May 2011
<i>Mekelle University</i> , Ethiopia -----	B.Sc. in Civil Engineering	June 2006

### **Research Positions**

*Graduate Research Assistant*, Department of Earth and Planetary Science, Johns Hopkins University, Baltimore, Maryland. August 2011 – 2015

- Built semi-automated rainfall prediction models, with various machine learning techniques such as Tree-based ensemble models (**Bagging**, **Random Forest** and **Boosting**), **Support vector Machines** and **Artificial Neural Network**, with **R** (**Shiny**), HTML, JavaScript, and CSS.
- Employed various Machine Learning techniques, statistical analysis and data mining methods using **Python** and **R** to understand interactions of atmospheric waves and their impacts on rainfall using large volume climate data.
- Analyzed large volume climate data, using **Python** and **R**, to investigate future climate conditions
- Completed many side-projects on big data using **Spark** (e.g., movie recommendation, web server log analysis, text mining and entity resolution and click-through prediction; available on my [website](#))
- Worked on many other side-projects using **R** (available on my [website](#))
- In addition to the data science courses I have done in grad school, I have taken more than 20 edx, coursera and Udacity data science courses (including data science specialization from Johns Hopkins University and big data XSeries from Berkeley) with **R**, **Spark**, **Python**, **Matlab**, and **Hadoop** and **MapReduce** (certificates on my [website](#))

*Graduate Research Assistant*, Department of Natural Resources and the Environment, University of Connecticut, Storrs, CT 2009 – May 2011

- Built and evaluated a model that predicts Nile River flow. Further, examined possible impacts of climate change on river flow using different climate scenarios.
- The main tools I used in this study: **R**, **Python** and GIS.

### **Publications and Presentations**

Three peer-reviewed publications in the Journal of Climate (JCL), which is among the most prestigious Journals in Atmospheric Science, one in preparation and a master's thesis.

More than 12 presentations, including in prestigious international conferences such as the American Geophysical Union (AGU) and the American Meteorological Society (AMS).

### **Teaching Experience**

*Teaching assistant (TA)*, Department of Earth and Planetary Science, The Johns Hopkins University, Baltimore, Maryland. Spring 2013  
*Assistant Lecturer*, Department of Civil Engineering, Mekelle University, Ethiopia 2006-2009

### **Skills**

Python, R, Matlab, Spark, SQL, HTML, CSS, JavaScript, Hadoop (familiar), MapReduce (familiar).
