### **Education**

Johns Hopkins University, Baltimore, MD

Ph.D. Candidate, Earth and Planetary Sciences, 2015

Thesis: Intraseasonal precipitation variability over tropical Africa

Advisor: Benjamin F. Zaitchik

M.A., Earth and Planetary Sciences May 2013

University of Connecticut

M.S., Natural Resources and the Environment, May 2011

Thesis: Model based assessment of potential impacts of climate change on the flow of  
the main headwaters of the Nile River: Equatorial Lakes Region and Blue Nile  
Basins

Advisor: Richard Anyah

Mekelle University, Ethiopia

B.Sc., Civil Engineering, June 2006

### **Research Positions**

Graduate Research Assistant, Department of Earth and Planetary Science, Johns Hopkins  
University, Baltimore, Maryland. August 2011 – 2015

- Built semi-automated rainfall prediction models, with various machine learning techniques such as Tree-based ensemble models (**Random Forest** and **Boosting**), **Support vector Machines** and **Artificial Neural Network**, with **R**, HTML, JavaScript, and CSS.
- Employed various statistical analysis and data mining techniques using **Python** and **R** to understand interactions of atmospheric waves and their impacts on rainfall using large volume climate data.
- Analyzed large volume climate data, using **Python** and **R**, to investigate future climate conditions
- Completed many side-projects on big data using **Spark** (e.g., movie recommendation, web server log analysis, text mining and entity resolution and click-through prediction; available on my [website](#))
- Worked on many other side-projects using **R** (available on my [website](#))
- In addition to the data science courses I have done in grad school, I have taken more than 20 edx, coursera and Udacity data science courses with **R**, **Spark**, **Python**, **Matlab**, and **Hadoop** and **MapReduce** (certificates on my [website](#))

Graduate Research Assistant, Department of Natural Resources and the Environment,  
University of Connecticut, Storrs, CT 2009 – May 2011

- Built and evaluated a model that predicts Nile River flow. Further, examined possible impacts of climate change on river flow using different climate scenarios.
- The main tools I used in this study: **R**, **Python** and GIS.

### **Awards**

Research Assistantship, Department of Earth and Planetary Sciences, Johns Hopkins University,  
Baltimore, Maryland 2012-2015

Morton K. Blaustein Fellowship, Department of Earth and Planetary Sciences, Johns Hopkins  
University, Baltimore, Maryland 2011-2012

Research Assistantship, Department of Natural of Resources and the Environment, University of  
Connecticut, Storrs, CT 2009-2011

### **Teaching Experience**

Teaching assistant (TA), Department of Earth and Planetary Science, The Johns Hopkins  
University, Baltimore, Maryland. Spring 2013

Assistant Lecturer, Department of Civil Engineering, Mekelle University, Ethiopia 2006-2009

### **Data Science related courses I have done**

#### **Graduate**

- Time Series Analysis
- Statistical Computing
- Data Analytics for Engineering, Policy Analysis and Management
- Inversion Modeling & Data Assimilation
- Spatial Statistics and Modelling

- Environmental Quantitative Methods
- Python Scripting for GIS

### **Undergraduate**

- Probability and Statistics
- Computer Programming (C++)
- Applied Mathematics I
- Applied Mathematics II
- Numerical Methods

### **Online (Coursera, edx, Udacity; certificates linked)**
