Education

Johns Hopkins University, Baltimore, MD --- Ph.D. in Atmospheric Physics   Sep. 2015
Johns Hopkins University, Baltimore, MD ----M.A. in Atmospheric Physics   May 2013
University of Connecticut, Storrs, CT ----------M.S. in Hydro-climatology   May 2011
Mekelle University, Ethiopia ---------------------B.Sc. in Civil Engineering   June 2006

Research Positions

Graduate Research Assistant, Department of Earth and Planetary Science, Johns Hopkins
University, Baltimore, Maryland.   August 2011 – 2015
- ➢ Built rainfall prediction models, with various machine learning techniques such as Tree-based ensemble models (**Random Forest** and **Boosting**), **Support vector Machines** and **Artificial Neural Network**, with **R,** HTML, JavaScript, and CSS.
- ➢ Employed various statistical analysis and data mining techniques using **Python** and **R** to understand interactions of atmospheric waves and their impacts on rainfall using large volume climate data.
- ➢ Analyzed large volume climate data, using **Python** and **R,** to investigate future climate conditions
- ➢ Completed many side-projects on big data using **Spark** (e.g., movie recommendation, web server log analysis, text mining and entity resolution and click-through prediction; available on my website)
- ➢ Worked on many other side-projects using R (available on my website)
- ➢ In addition to the data science courses I have done in grad school, I have taken more than 20 edx, coursera and Udacity data science courses with R, Spark, Python, Matlab, and Hadoop and MapReduce.

Graduate Research Assistant, Department of Natural Resources and the Environment, University
of Connecticut, Storrs, CT   2009 – May 2011
- ➢ Built and evaluated a model that predicts Nile River flow. Further, examined possible impacts of climate change on river flow using different climate scenarios.
- ➢ The main tools I used in this study: **R**, **Python** and GIS.

Publications and Presentations

Three peer-reviewed publications in the Journal of Climate (JCL), which is among the most prestigious Journals in Atmospheric Science, one in preparation and a master's thesis.
More than 12 presentations, including in prestigious international conferences such as the American Geophysical Union (AGU) and the American Meteorological Society (AMS).

Teaching Experience

Teaching assistant (TA), Department of Earth and Planetary Science, The Johns Hopkins University, Baltimore, Maryland.   Spring 2013
Assistant Lecturer, Department of Civil Engineering, Mekelle University, Ethiopia   2006-2009

Skills

Python, R, Matlab, Spark, SQL, HTML, CSS, JavaScript, Hadoop (familiar), MapReduce (familiar).
